

SOGIP RESEARCH PROGRAM

(Scales of Governance, the UN, States and Indigenous Peoples: Self-Determination in the Age of Globalization) is a global, multi-scale, comparative research project investigating the social, cultural and political issues relating to governance and the rights of Indigenous Peoples. The project is founded on an original research framework designed to capture the complex relationships between the global and the local in an

While the mechanisms for constitutional, legal and political recognition remain largely defined by nation states, the appeal of Indigenous Peoples to the international community in the second half of the 20th century and the current transcontinental mobilizations of Indigenous Peoples have led to increasing global awareness and recognition. The adoption of UNDRIP represents the culmination of this global movement,

The research of the SOGIP team simultaneously addresses the changes that international norms produce via the development of international programs and the responses of States

THE WORKSHOP

While the mechanisms for constitutional, legal and political recognition remain largely defined by nation states, the appeal of Indigenous Peoples to the international community in the second half of the 20th century and the current transcontinental mobilizations of Indigenous Peoples have led to increasing global awareness and recognition. The adoption of UNDRIP represents the culmination of this global movement, The research of the SOGIP team simultaneously addresses the changes that international norms produce via the development of international programs and the responses of States and Indigenous Peoples at the local level. addresses the changes that international norms produce via the development of international programs and the responses of States and Indigenous Peoples at the local level
